

# MOVIO: Interactive digital storytelling for mediation and valorisation of cultural heritage

Sam Habibi Minelli META S.r.L

**AthenaPlus** workshop

**Berlin 9 October 2013** 

# **Promoting CH**

- One of the main goals of the GLAMs (galleries, libraries, archives, and museums) is the promotion and dissemination of knowledge and culture.
- They accomplish their mission thanks to knowledge dissemination activities that include, among others, temporary and permanent exhibitions and performances that follow codified models, whose goal is to expose citizens to the national and international cultural and artistic heritage.

## How To

The meeting between the languages and methods of traditional cultural promotion (non-virtual exhibitions)

and the promotion and dissemination of knowledge through web-based methods (online virtual exhibitions) have made it necessary in Italy

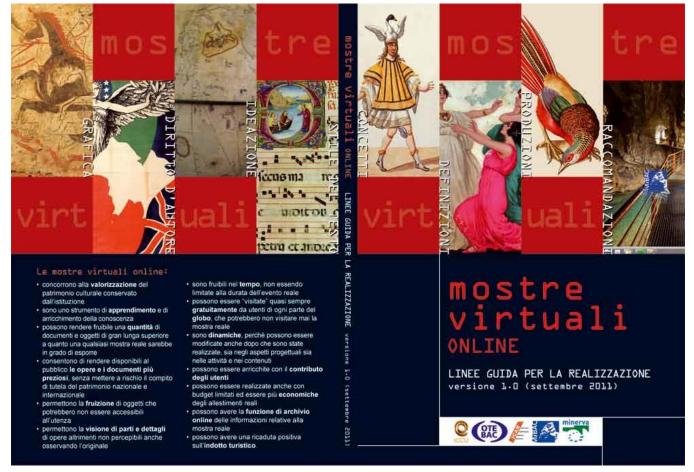

to propose **shared guidelines and recommendations** that encourage the use of the web and maximize its potential for non-virtual exhibitions.

# First guidelines

http://www.otebac.it/index.php?it/320/mostre-virtuali-online-linee-guida-per-la-realizzazione

## Goals

These guidelines, edited by MiBAC, aim at:

- illustrating the state of the art on online virtual exhibitions, both on the basis of the actual experience accrued by various Italian institutes and the observation and analysis of international products
- clarifying some concepts that in literature are not yet fully codified, and give some recommendations and a tool kit to institutions who want to realize projects.

## Definition of DE

### An online virtual/digital exhibition (DE) is

- a hypermedia collection accessible via the web, and made up of digital items which are:
- linked together by a common threat, an inter-disciplinary topic, a concept, an idea, an anniversary, a special event, or a physical person
- displayed in 2D or 3D
- occasionally memorised in distributed networks
- made accessible through the potential provided by modern technology, thanks to a system architecture designed to provide user-centred, absorbing experiences
- dynamic products that can offer services and be updated periodically.

It can be generated by a real event or born digital.

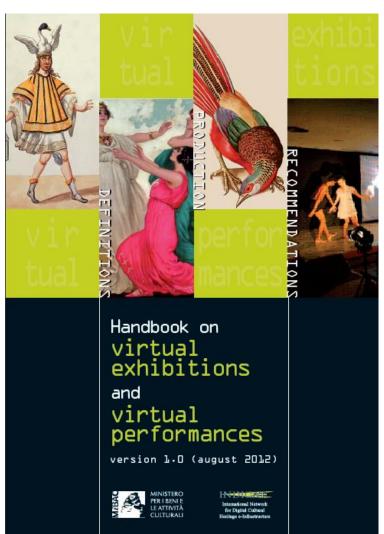

### From content to DE

- A collection of digital items, in and of itself, does not constitute a material or virtual exhibition. It is only when the items are carefully selected to illustrate a topic, and are tied together forming a narrative or a logical itinerary, that they constitute an exhibition.
- Online virtual/digital exhibitions, independently of degree of sophistication of the technology used, can and must be put together in such a way that they can provide alternative experiences to the real event, which can involve the user in a process of discovery, knowledge acquisition, and learning.

# English edition

In the framework of the INDICATE project

http://www.indicate-project.eu/

Other references: INDICATE workshop (2012) on digital exhbitions

INDICAT

International Network for Digital Cultural Heritage e-Infrastructure

The scope of the workshop was to present best practice examples of virtual exhibitions, to discuss how e-Infrastructures can be used to enhance virtual exhibitions applications, to analyse the resources which e-Infrastructures offer, and how they can be deployed to deal with virtual exhibitions implementations.

# **Today and Tomorrow**

**Today** 

# Key trends (1/2)

- Evolution of the Web: abundance of correlated resources -> change of the role of the educators and cultural guides by answering to new needs of students and visitors, helping them to navigate safely and generate satisfaction from the fruition of CH.
- Evolution of the devices: the new generation of smart-phones and tablets offer new paradigms of fruition of CH goods. These devices are 'useful' and provide a wide range of applications and functionalities, they enable 'communication' not only in the strict circle of our direct contact, they are 'simple'.
- Evolution of different user habits: social skills are emerging, users create new forms of content through communication and narration, they share knowledge, they follow emerging experts, they express what they like/dislike more. Personalization.

# Key trends (2/2)

■ Evolution of institutions' processes: The museums, archives and libraries include new digital and multimedia strategies to document, preserve and communicate.

Growing collaboration and internationalization: the cultural institutions need collaborative models also including the sharing of (digital) creative content.

### Success factors

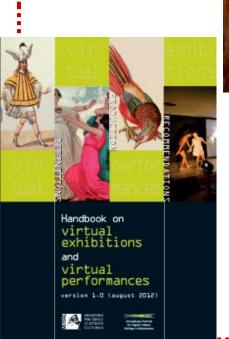

- **☐** Create Experience
- □ Transform intangible to interactive and thus 'tangible'
- ☐ Create new culture and knowledge
- Personalization
- □ Territorial engagement
- □ Use new media, technologies processes
- □ Social networks: crows creations, involvement, narrations
- □ Promotion and dissemination of knowledge

# From Theory to Practice

### Instruments to build DE

IS A **Kit** to BUILD *online and mobile* virtual/digital EXHIBITIONS

# MOVIO project

- project by ICCU
- >cofunded by Fondazione Telecom Italia
- developed by GruppoMeta

MOVIO was designed to build digital exhibitions.

It aims at enabling GAMs to highlight masterpieces of their collections, as well as less known or "not visible" works of art.

An example of public-private partnership

## **MOVIO KIT**

### The kit consists of:

- an open source CMS for the creation of online virtual exhibitions
- the equivalent version for mobiles (iPhone, Android for smartphones and tablets)
- the version of App for popular mobile platforms (iMovio)
- online tutorials and training

The kit will put in practice and validate what declared in the guidelines

## Participating institutions

- ➤ Soprintendenza per i beni archeologici del Lazio
- ➤ Archivio storico e museo aziendale Birra Peroni
- >ICAR
- ➤ Regione Lazio
- ➤ Biblioteca nazionale centrale di Roma
- ➤ Regione Lazio
- >ICCU
- ➤ Direzione Generale Archivi
- ➤ Biblioteca nazionale centrale di Roma
- >SSPSAE e Polo Museale della Città di Roma
- ➤ Museo nazionale di Castel Sant'Angelo
- ➤ Soprintendenza per i beni archeologici del Lazio
- ➤ Accademia Nazionale dei Lincei
- ➤SSPSAE e Polo Museale della Città di Roma
- ➤ Biblioteca Alessandrina
- ➤ Soprintendenza per i beni archeologici dell'Etruria meridionale
- ➤ Museo del Risorgimento
- ➤ Archivio Fondazione Telecom

#### 1. Una citta' in movimento

Conflittualità sociale: lotte politiche, arretratezza e modernizzazione a Roma all'inizio del Novecento 📤

La prima sezione dell'Archivio Fotografico-Iconografico della Biblioteca Universitaria Alessandrina è dedicata alla Roma d'inizio Novecento, e le immagini delle lotte sociali si sovrappongono a quelle concernenti il progressivo tramonto dell'Urbe clerico-conservatrice, quindi l'affermazione del "blocco popolare", nonché della giunta laica, democratica e progressista guidata da Ernesto Nathan.

La sezione, inoltre, si articola in ulteriori passaggi che illustrano in maniera monografica i profondi mutamenti riguardanti la Roma primonovecentesca: società, lavoro, imprenditoria, costumi, l'incedere del "progresso" e il permanere della "tradizione", il rapporto fra Urbe ed Agro, compreso un lungo, corposo segmento dedicato alla radicale trasformazione urbanistica e alla "rivoluzione" architettonica che, dopo l'Unità d'Italia, continua ad interessare la Capitale all'alba del

## Main features

- Multilingual back-end and front-end
- Page content management
- Ontology Builder
- > Template management
- Users management (internal and external)
- Media archive (localized).
- Management of meta-tag/microschema for SEO
- ➤ Support Feed/RSS
- ➤ Integration of features connected to social networks (Facebook, Twitter e Four Square, and User Generated Content)
- Management of tools (slider, slideshow, pageflip, timeline)
- Modifiable Pagetypes
- Integration with external thesauri
